

Special projects

Nieuwkoop Europe is a leading supplier in the field of exclusive plants, design planters and decorations for special projects. We provide the best advice and service, whether it concerns resolving complex logistics issues or assisting in realising planting schemes.

These projects include planting schemes at zoos, tropical swimming pools, workplaces, airports, hotels, shopping centres and holiday parks.

Planting up large numbers of planters in order to offer you a beautiful, professional and complete product is daily routine for us. In addition to our extensive range of planters, we also provide bespoke solutions. Nothing is impossible. We will be happy to offer you our creativity and assistance, and contribute ideas.

To make a huge success of a project our specialists and the professionals from our network will be pleased to offer their assistance from the very start. We will assist you in the broadest sense of the word, which includes advice about:

- The amount of daylight in the room where the plants are to be placed
- The choice of plants, varieties and sizes in the project
- The type of compost/substrate the plants need
- The maintenance and climate essential for the development of plants
- Positioning and transport of the plants.

The plants and hardware for our special projects are imported from all over the world. The imported plants are first cared for intensively and acclimatised on our own premises. This can take up to several weeks and sometimes even months! It is an important part of the aftercare after importation of the plants. Quality is our priority at all times!
