Alegria

Great
structures
stand out

ALEGRIA

is made by hand, so every planter is unique and can display minor differences from the others. GFRC (glass fibre reinforced concrete) is durable and will save on costs; compared with ceramic material, it will be less damaged by impacts. The combination of using the most modern production techniques and having well-trained craftsmen finish these planters by hand means that Nieuwkoop-Europe can produce products in almost every natural or synthetic texture and color. Due to their body material, these planters can better withstand frost than plastic planters.
